

Publication - National Ocean Service - U.S. Coast Pilot 6, covers the Great Lakes system, including Lakes Ontario, Erie, Huron, Michigan, and Superior, their connecting waters, and the St. Lawrence River., 2012 (42nd) Edition.

Corrections

Chapter 10, Paragraph 324, read:

(324) A harbor basin on the east side of Old Mackinac Point is enclosed by a railroad pier with a breakwater extending north from its outer end and by a combination breakwater and dock extending from shore on the north side of the basin. In 2012, the controlling depth was 8 feet. Lights mark the ends of the breakwaters at the entrance.

Chapter 11, Paragraph 151, read:

(151) **South Manitou Island** is 6.8 miles north of Sleeping Bear Point and 3.9 miles southwest of North Manitou Island with a deep channel between. The island is hilly and bluff on the west side and lower and wooded on the east side. A 54-foot high private lighthouse is on the southeast point of the island. The shores of the island are relatively deep-to, except the south side where shoals with depths of 10 to 19 feet extend 1 mile offshore. Detached 18- and 19-foot spots are 1.5 miles south and 2.8 miles southwest of the island, respectively. A lighted gong buoy is on the southwest side of the 19-foot spot. **South Manitou Harbor**, on the east side of the island, affords anchorage with good holding ground and protection from southwest through north to northeast winds.

Chapter 11, Paragraph 815, read:

(815) A dredged entrance channel leads north from deep water in Detroit Island Passage between Washington Island and the west side of Detroit Island for 0.7 mile to a turning basin in the southwest corner of Detroit Harbor. In 2010, the controlling depth was 13 feet in the channel with lesser depths along the edges of the channel, thence depths of 10 to 14 feet were available in the basin. The channel and basin are marked by lighted and unlighted buoys and lights. A mariner radio activated sound signal at the entrance light, is initiated by keying the microphone five times on VHF-FM channel 83A.

Chapter 11, Paragraph 1000, read:

(1000) A dredged channel leads from the deep water in Little Bay de Noc to a basin off the waterfront at Kipling, 1.5 miles north of Saunders Point. In 2012, the controlling depth was 23 feet in the channel and basin.

(DD 22083)

Chapter 11, Paragraph 1024, read:

(1024) **Manistique Light** (45°56'42"N., 86°14'51"W.), 50 feet above the water, is shown from a tower on the outer end of the east breakwater. A mariner activated seasonal sound signal at the light is operated by keying the microphone five times on VHF-FM channel 83A.
